>> PROFILE

AWS Cloud Architect & Technical Leader with 11+ years of experience building automated, enterprise-scale developer platforms. I am a security-obsessed, AI-powered nerd who architects Kubernetes and GitOps workflows to drive high-velocity, zero-vulnerability environments. Ever-evolving, continuously curious—let's get to extracting maximum value from your infrastructure and operations.

>> TECH STACK

- x **Cloud & Infrastructure** | AWS (Multi-Region), Azure, Kubernetes (EKS), IaC (Terraform, Ansible), Serverless Architecture, Cloud-Native Modernization, Well-Architected Framework, Vault, Docker, Helm
- x **AI Technologies** | LLM Ops, AWS Bedrock, OpenAI, Anthropic, Gemini, GitHub Copilot, Agents Skills, LLM Integration
- x **Security & Compliance** | Zero Trust Architecture, Shift-Left Security, Sovereign Cloud (Data Residency), Secrets Management, Wiz, Lacework, Snyk, RBAC, ISO 27001, NIST 800-53, SOC 2, GDPR
- x **Observability & SRE** | Grafana, Prometheus, Graylog, New Relic, Datadog, Sentry, CloudWatch, PagerDuty, SLOs, Blameless Postmortems
- x **CI/CD & GitOps** | GitHub Actions, ArgoCD, Jenkins, GitLab CI/CD
- x **Programming & Database** | Python, Bash, PowerShell, AWS CLI, SQL, PostgreSQL, MongoDB, Elasticsearch

>> EXPERIENCE

Trackforce

Cloud Architect, 04/2022 - 02/2026

Lead Cloud/DevOps Engineer, 03/2020 – 04/2022

Cloud/DevOps Engineer, 04/2019 – 03/2020

Infrastructure Architecture & Platform Engineering | AWS & Kubernetes

- x Architected a multi-region AWS infrastructure (EC2, S3, CloudFront, FSx, ALB) ensuring data residency and fault tolerance across Test, Stage, and Prod environments.
- x Reduced infrastructure provisioning time from days to hours by refactoring legacy processes into modular Terraform code.
- x Designed and operated multi-cluster EKS platforms serving Golang microservices, MongoDB, and NATS messaging.
- x Managed automated deployments and drift detection via ArgoCD and Helm, ensuring namespace-per-application isolation.
- x Administered Linux EC2 instances at scale using Ansible, ensuring 100% configuration consistency across 100+ nodes.

Observability & Reliability | SRE

- x Led the Incident Committee, leading cross-functional reviews of major outages and driving systemic improvements to platform stability.
- x Reduced MTTR by 50% through the implementation of PagerDuty on-call rotations and established SLOs with error budgets, achieving a 3-minute MTTA.
- x Built an enterprise observability stack (Metrics, Logging, Tracing) with custom dashboards, enabling developers to self-service monitoring.
- x Led blameless postmortems via the Incident Review Committee, driving culture changes and handling hundreds of incidents.

ADELORE LESSARD

adelore.lessard@gmail.com x +1 707-758-5866 x <https://github.com/on3iropolos>

AI Automation & Innovation

- x Championed internal AI adoption, mentoring the engineering team on AI-assisted development practices.
- x 50% Reduction in Resolution Time: Leveraged AI daily for debugging, code generation, and infrastructure-as-code, significantly accelerating ticket resolution.
- x Eliminated production bottlenecks by engineering an AI-Skill and GitHub Action to audit PRs and automate antivirus exclusions.
- x Collaborated with engineering teams to implement customer-facing AI features in high-engagement applications.

Security & Compliance

- x Partnered with the CISO to architect an enterprise environment fully compliant with ISO 27001, SOC 2, and GDPR controls.
- x Directed the lifecycle management of customer-facing PKI, including the planning and execution of a complex Root CA renewal via AWS KMS and Vault.
- x Architected multi-account AWS Organization featuring isolated subnets and restrictive security groups to prevent lateral movement.
- x Integrated Lacework, Wiz, and Snyk for continuous vulnerability scanning, maintaining zero critical vulnerabilities across annual audits.
- x Deployed Microsoft Entra ID (SSO) with MFA for centralized identity and access management.

Leadership & Mentorship

- x Led the Architecture Committee, collaborating with developers and product owners on technical decisions and roadmap planning.
- x Mentored engineers on cloud architecture and DevOps practices; active participant in hiring and interviews..

Managed Solution

Field Engineer, 08/2018 – 04/2019

- x Delivered IT operations for 12 enterprise customers across Biotech, Software, and Medical industries.
- x Ensured HIPAA and ISO compliance controls across hybrid cloud infrastructures (Azure, AWS) and firewalls (Cisco, SonicWall).

Willis Lease Finance Corporation

Systems Administrator & Support Lead, 12/2015 – 08/2018

- x Led IT operations for an international, multi-domain 24/7 production environment.
- x Successfully brought 2 subsidiaries into SOC 2 compliance.
- x Managed a team of 3 technicians supporting 225+ users.

Fountaingrove Golf & Athletic Club

IT Specialist, 01/2013 - 12/2015

- x Oversaw all IT operations for Windows domain, physical servers, and network infrastructure including VPN tunnels and wireless bridges.

ADELORE LESSARD

adelore.lessard@gmail.com × +1 707-758-5866 × <https://github.com/on3iropolos>

>> CREDENTIALS

- × **Education** | *Western Governors University - B.S. IT Management, 2019*
- × **AWS Certification** | *Certified Solutions Architect Associate, 2023*
- × **Wild Medical Assoc** | *Wilderness First Responder, 2021*

>> PERSONAL DEVELOPMENT

- × **Technical Research & Home Lab** – Orchestrate a private cloud environment using Proxmox and K3s; utilize Ansible, Terraform, and Packer to automate the lifecycle of immutable Linux-based infrastructure.
Source Code: <https://github.com/on3iropolos>
- × **AWS Professional Certification** – Currently pursuing Solutions Architect Professional to deepen expertise in enterprise-scale cloud architecture.
- × **Open Source Contributor** – Occasional code contributions to OpenBeta, focusing on open data access for the climbing community.
